Based on a report in a 2003 Supplemental Issue of *Access on Magnification Use In Dental Hygiene*, Magnification loupes extend a dental clinician's career by decreasing the physical strains associated with achieving clear oral cavity visualization while providing superior patient care

LOUPES CAN HELP REDUCE MOTION AND STATIC POSTURE STRESSORS BY:

- *IMPROVING DENTAL CLINICIANS' VISUALIZATION¹*
- *REDUCING CHAIR TIME PER PROCEDURE DUE TO BETTER VISUALIZATION¹*
- *IMPROVING OVERALL POSTURE BY NOT REQUIRING DENTAL CLINICIANS AND DENTAL HYGIENISTS TO LEAN FORWARD IN ORDER TO SEE THE ORAL CAVITY¹*

USING MILTEX® LOUPES PROVIDES THE FOLLOWING BENEFITS TO THE PATIENT:

- *ENHANCED TREATMENT – DENTAL CLINICIANS CAN BETTER VISUALIZE ORAL ISSUES AND PROBLEMS AND CAN MORE EASILY DEVELOP A TREATMENT PLAN*
- *BETTER DELIVERY OF CARE – DENTAL CLINICIANS AND HYGIENISTS CAN BETTER VIEW THEIR WORK, LEADING TO BETTER OVERALL DENTAL CARE*
- *ACCURATE ASSESSMENT – DENTAL CLINICIANS AND HYGIENISTS CAN MORE ACCURATELY ASSESS OVERALL POCKET DEPTH AND INTEGRITY OF RESTORATION MARGINS*

CHOOSING THE RIGHT MAGNIFICATION

CHOOSING THE PERFECT LOUPES FOR YOU IS SIMPLE JUST FOLLOW THESE 3 EASY STEPS FOR A PERFECT MATCH

STEP 1: CHOOSE YOUR MAGNIFICATION

If you are a new loupes user, start with the lowest power you need. Most dental professionals begin using loupes with a magnification power of 2.5x. Remember, as the magnification increases, the field of view, focal range and light transmission decreases.

STEP 2: CHOOSE YOUR WORKING DISTANCE

All loupes are pre-set to focus at a certain distance and objects will remain in focus within a range of several inches around that pre-set point. Miltex® loupes are available in 4 working distances: Short (10-13"), Regular (12-16"), Long (14-18") and Extra Long (16-20").

STEP 3: ENJOY!

Miltex has long been committed to providing top quality products. We are confident that these loupes will assist you in practicing better dentistry with proper ergonomics and clearer vision.

- **The 250 Series (2.5x)** is the highest ideal general purpose optic. The 250 series optic will provide a magnified view of approximately 2.5 times the object size. Most first time loupes users choose this magnification.
- **The 300 Series (3.0x)** is an ideal optic for individuals who have worked with a 2.5x magnification power optic and want to step up in power. The 300 series optic provides a view of the entire quadrant of the mouth and has an excellent depth of focus.
- **The 350 Series (3.5x)** is the highest magnification available in a compound lens design. The 350 series optic is an excellent choice for dentists requiring high magnification in lightweight loupes.

Please use the chart below as a general guide to choosing your loupes. Please remember that this is a general guide and preferences can differ.

Discipline	Your Height		
	under 5'7"	5'7" to 6'4"	over 6'4"
General Dental	2.5x/3.0x - Regular	2.5x/3.0x - Long	2.5x/3.0x - X Long
Hygiene	2.5x - Regular	2.5x - Long	2.5x - X Long
Endodontics	3.0x/3.5x - Regular	3.0x/3.5x - Long	3.0x/3.5x - X Long
Oral Surgery	3.0x/3.5x - Regular	3.0x/3.5x - Long	3.0x/3.5x - X Long

WHAT IS THE FIELD OF VIEW?

The Field of View is the size of the area seen through magnification loupes. Clinicians appreciate a wider field of view because it is easier to adjust when shifting from the naked eye to the loupes and it may reduce eye fatigue. Field width is linked to the magnifying power of the loupes – the higher the power, the smaller the field.
