DENT-GLS6-BROC

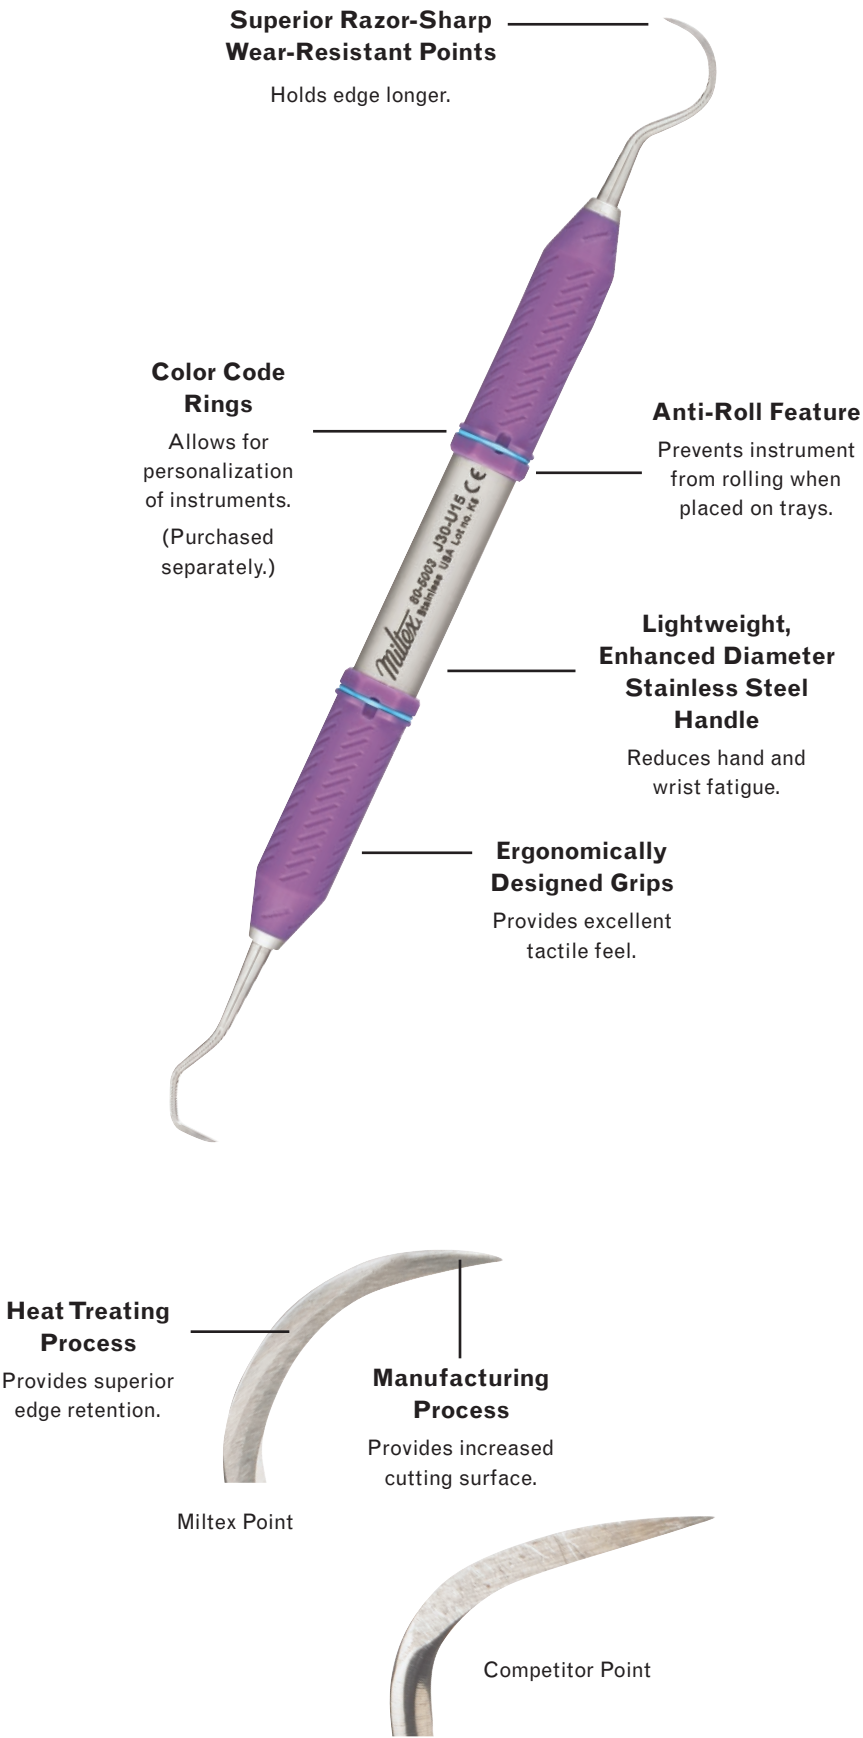

The Miltex GripLite™ S⁶ hygiene hand instruments are designed with the dental hygienist in mind. After consulting with leaders in the field of hand ergonomics as well as practicing hygienists, we identified six attributes to help reduce hand and wrist fatigue with increasing efficiency:

- Soft, comfortable tactile grips
- Wear-resistant, razor-sharp points
- Lightweight, durable stainless steel handle
- Anti-roll feature
- Color coding by instrument families
- Personal identification, with color code rings

The GripLite™ S⁶ instruments are the only hand instruments in the market to incorporate all six features. Additionally the color coding system can be further enhanced by using Thompson™ instrument cassettes to store, organize, protect and sterilize GripLite™ S⁶ instruments.

See the Difference

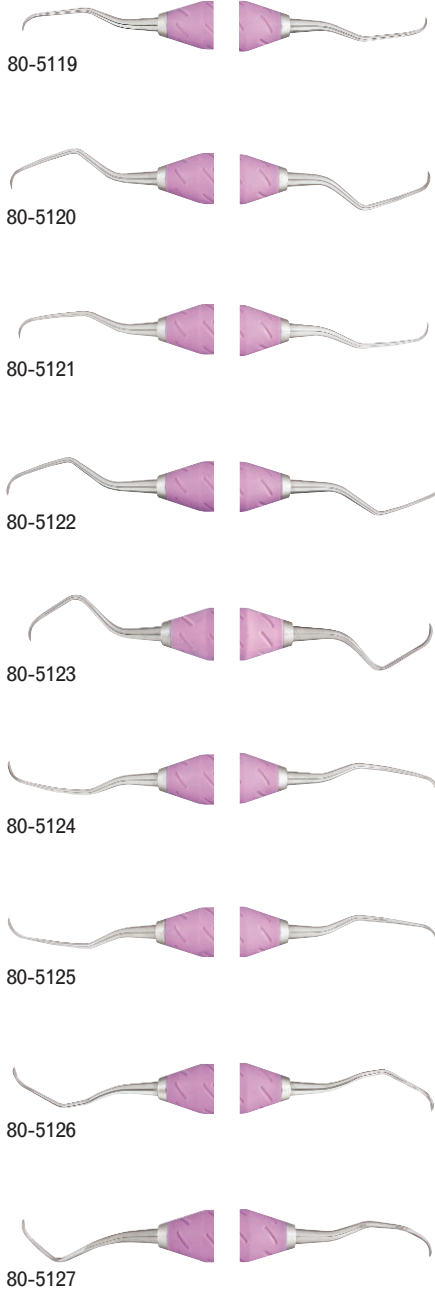

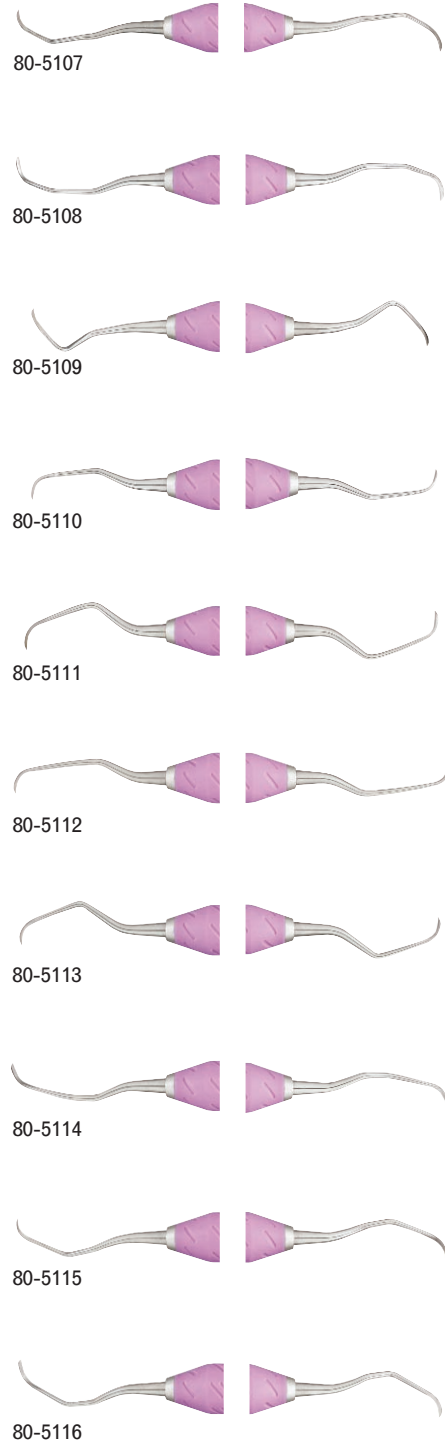

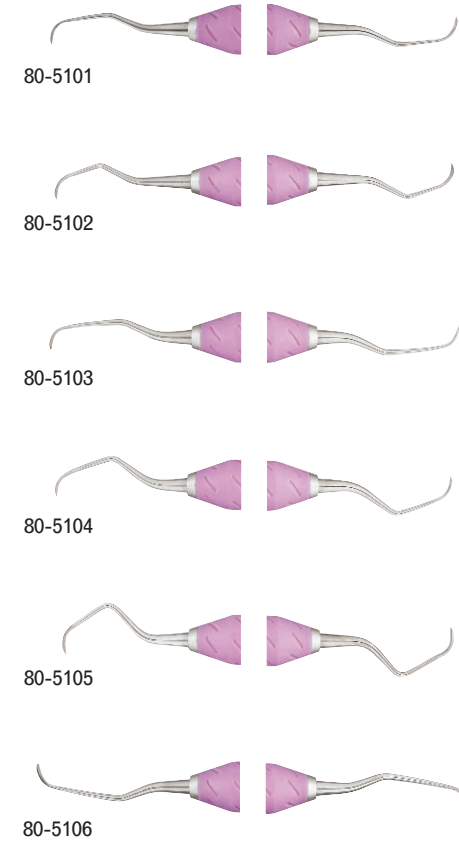

A unique heat treating and manufacturing process provides a superior razor-sharp wear-resistant point, which is standard on all Miltex® hand instruments.

Curettes

Curettes are designed to adapt to a specific area or tooth surface. They are primarily used for subgingival surfaces.
